If you want to find someone who will fall deeply in love with you and you with them, then this system will help you to realize it. Having someone to love and being loved in return is life's ultimate experience, and it's sad to realize the number of aching lonely people who haven't or aren't able to experience deep, true love. The older you become, the chances are increased that if you don't make this quest a priority, the more difficult it becomes and the greater the likelihood you will be alone to the end.

If you've ever sold or marketed a car or a home, I'm sure you'll agree that it's important to get professional advice or help, because after all this is a valuable possession, right? If you want to get the best price possible, you'll want to make sure you carefully execute the most effective and sensible marketing plan possible.

What if I told you that the same principles that apply to buying and selling multi-million dollar real estate can and should be applied to finding love and romance in your life? Romantic Chemistry is of course critical to truly falling in love, so if you are going to fall in love with someone, doesn't it make sense to also have the basic core values that are important to lasting and successful relationships?

In order to get the best price for buying and selling a home (or any other high ticket item for that matter), you hire a professional that uses data and the internet to obtain the highest and best value. It begins with a comparative market analysis, making the home as inviting as possible, then marketing it to the most buyers possible.

When we go searching for our perfect partner, we need to go to the theoretical "Interpersonal Marketplace" to find them. The Interpersonal Marketplace reasons that whom we are attracted to depends a lot on how much we think we have to offer and how much we think we can "buy" with it. Whether you're marketing a home or yourself, both are subject to the laws of basic economics 101 – supply and demand.

LONG SYNOPSIS:

This book shows you how fun and exciting it is to be able to easily approach practically any woman, practically anywhere and have an instant humorous connection with her. You can have amazing results by simply learning and practicing some minor modifications in your mindset, body language and life style.

It's very liberating to be able to approach and flirt with practically any female who strikes your fancy. It doesn't matter how young or attractive she may be. You will have them laughing and joking with you in a connected way almost immediately.

It's like you've become a famous celebrity that everyone likes and wants to hang with.

One of the most exciting and fun things you're going to learn here is how to instantly create attraction and rapport with women, and you don't have to be rich or handsome to do it.

Many men say that approaching women they want to meet is one of the most terrifying and difficult things they've ever tried. It ranks right up there with public speaking and root canals.

By the time you finish this book you will have discovered some amazing revelations about female evolutionary psychology and human behavior. You will learn the hidden secret desires that women are subconsciously and irresistibly attracted to. This information will cause you to better understand and totally rethink the way you relate and talk to women.

You're going to learn how and why women have been genetically programmed over tens of thousands of years to be automatically attracted to certain male traits and habits, known as "Attractor Factors." You will learn what those qualities are and how you can adopt them while at the same time not compromising your core values.

You're also going to learn how to eliminate all those destructive (feminized) habits that are total turn-offs to women. Many of them have been possibly sabotaging your efforts with women for many years and you probably weren't even aware of them. There's a good chance that those anti-masculine habits contributed to a woman cheating on or leaving you.

Male and female blueprints that have evolved over 200,000 years have been suddenly and drastically altered over the last 50. That is a 4,000 to 1 ratio. In many ways, male and female roles are no longer how they evolved, and the sudden shift has had major social consequences.

This is one of the primary reasons why there are so many feminized males (often referred to as wusses) that are unsuccessful in attracting women because they are acting like women themselves. It doesn't work. You can't reverse tens of thousands of years of conditioning over a 50 year period and expect different results.

At the same time, it's been proven in studies that many women who think and say they desire sensitive, emotional, nice guys – (who are in reality, feminized men), are actually unconsciously attracted to masculine men who are not sensitive or emotional at all. Research showed that when those women met men in speed

dating encounters, they overwhelmingly and almost always instinctively chose the men who displayed the alpha male traits and turned down the passive sensitive men.

5 POINTS OF INTEREST ABOUT THE BOOK'S CONTENT OR STORY:

1. This book is for men who have the desire but also the fear to approach a woman they're interested in
2. It shows you how to have an instant, humorous connection with her
3. There is a 12 step program for making the best first impression
4. It talks about the 3 types of pickup lines, and which ones work best for different women
5. The book reveals the ultimate pick up line that has never failed

ADVICE TO MEN ON HOW TO USE HUMOR & BODY LANGUAGE TO MAKE WOMEN WANT YOU

Based on evolutionary psychology, this book shows how to use humor and "Attractor Factors" that are irresistible to nearly all women.

Palm Desert, California – May 25, 2014 – *How to Attract Women with Humor* shows how fun and exciting it is to be able to easily approach practically any woman, practically anywhere and have an instant humorous connection with her. It says you can have amazing results by simply learning and practicing some minor modifications in your mindset, body language and life style.

"Women are actively looking for those men who have the ability to unlock the code to their natural instinctive desires, and you're going to learn how to develop those "Attractor Factors" that tap into a woman's primal needs and desires"

How to Attract Women with Humor (Amorado Cloud Productions, 2013, ISBN-9781301809301 - www.TheCompanionator.com)

"A clever and humorous introduction instantly short-circuits her usual defense mechanisms and right away you've made a good first impression. You've immediately overcome that initial moment of awkwardness that usually accompanies meeting someone for the first time and now it's much easier to establish rapport. When you start out with a humorous outrageous quote – you can then say practically anything after that and get away with it."

One of the most exciting and fun things this book teaches is how to instantly create attraction and rapport with women, and one doesn't have to be rich or handsome to do it. Many men say that approaching women they want to meet is one of the most terrifying and difficult things they've ever tried. It ranks right up there with public speaking and getting a root canal.

This book reveals startling revelations about female evolutionary psychology and human behavior. It discusses the hidden secret desires that women are

subconsciously and irresistibly attracted to. This information helps men to better understand and totally rethink the way they relate and talk to women.

Below are some tips the author suggests when using humor to meet women:

“Humor is just the ice breaker – you also have to learn how to develop your masculine, romantic, seductive side of yourself to add to the humor – you just can’t use humor alone.”

1. Learning how to develop masculine body language is one of the easiest and quickest things you can do to make yourself more attractive to women:

“You should take up a lot of space when you stand, sit walk or relax – walk upright with confidence, smoothness and with good posture - practice your body movements in the mirror whenever possible”.

2. Discover how to make a good first impression –

“A good first impression is critical to how your date will perceive you, because everything you do after is either diminished or enhanced by the first impression. I give several tips in the book on how to do this using the proper body language, eye contact and touching”.

3. Learn how to flirt -

“Getting yourself in the right frame of mind prior to meeting is critical. Be prepared with the right questions to ask – ones that invite positive emotions and not ones that sound like you’re conducting an interview”.

4. Learn how to create attraction with your eyes -

“Learning how to keep eye contact just a second longer than normal escalates attraction – use the triangle look when using eye contact by looking at the left eye, the right eye, the lips, and slowly back again”.
